

ADSB and ADNOC Logistics & Services Partner to Enhance In-Country Value with Construction of Two Vessels

EDGE entity [Abu Dhabi Ship Building](#) (ADSB), the UAE's leader in the design, new build, repair, maintenance, refit, and conversion of naval and commercial vessels, announced that it is building two 28-metre vessels for ADNOC Logistics and Services plc (ADNOC L&S) (ADX symbol ADNOCLS / ISIN AEE01268A239), a global energy maritime logistics leader.

The order for these vessels further strengthens the relationship between ADNOC L&S, a global energy maritime logistics leader, and ADSB in the strategically important commercial vessel building sector, allowing greater contribution to in-country value.

The vessels are each powered by two diesel engines coupled with two Z-drive Azimuth thrusters. This configuration allows them to achieve a speed of 12 knots and a bollard pull of 60 tonnes. Each has a crew complement of eight and will be used primarily for ship assistance and harbour towing, as well as for firefighting and coastal towing.
